EXPERIENCE

Soliz Interactive

Unreal Developer

Hanoi, Vietnam

Sep 2024 – Present, Full-time

- Developed gameplay mechanics and UI features across multiple shipped titles including Zone Nine Nihilation (Epic Games Store) and Katana Inu (Steam) using both C++ and Blueprints in Unreal Engine 5.
- Implemented and maintained single-player and multiplayer game systems using Unreal Engine's networking framework.
- Took over and completed the Epic Online Services integration ahead of the previous timeline, enabling cross-platform online functionality across the company's projects.
- Managed the company's Epic Games Dev Portal, covering organization settings, game version releases, access key management, and store configuration.
- Collaborated with a cross-functional team across the full game development lifecycle.

Softdreams

Android Developer

Hanoi, Vietnam

Dec 2023 – Feb 2024, Internship

- Developed and maintained EasyDocs, an application that streamlines online electronic contract management operations on Android and iOS platforms.
- Delivered optimal UI/UX for the mobile app and developed new functionalities, such as sharing contracts and viewing contract history.
- Collaborated with cross-functional teams, including business analysts, testing teams, and design teams, to ensure high-quality feature delivery.

AWARDS & ACHIEVEMENTS

Provost's Commendation: La Trobe University's award for students who have completed a minimum of 90 credit points and achieved a Weighted Average Mark (WAM) of at least 85% across all subjects undertaken in the 2023 academic year. (Apr 2024)

Top 5 National Finals Schneider Go Green 2023 Vietnam: A global competition organized by Schneider Electric, focusing on innovative solutions for energy efficiency and sustainability. (Aug 2023)

PROJECTS

Zone Nine: Nihilation | [Epic Games Store](#)

- A competitive 5v5 PvPvE multiplayer third-person shooter set in a post-apocalyptic world, currently in closed beta on the Epic Games Store.
- Contributed gameplay and UI features using Unreal Engine 5, both C++ and Blueprints. Integrated Epic Online Services for essential multiplayer functionalities (Authentication, Matchmaking, Friends, Voice Chat, Storage).
- Enhanced the gunplay system by adding recoil mechanics, refining bullet spread behavior, and adding customizable crosshair settings.
- Developed spectator system to support casting and live observation of matches.
- Built UI components leveraging Unreal's Common UI framework and optimized existing UI widgets.
- Implemented localization support to enable multi-language releases.
